

## Seeds

**1. Cut on solid black lines. Fold on dashed lines.**

**2. Fold A and B to middle.**

**3. Fold C up.**

**4. Fold propeller blades outward.**

**5. Test fly by dropping from over your head.**

**Paper Helicopter Pattern**

The diagram illustrates the five steps of assembly. Step 1 shows the flat pattern with dashed lines for folding. Step 2 shows the side strips (A and B) being folded inward toward the center. Step 3 shows the central strip (C) being folded upward. Step 4 shows the side strips (A and B) being folded outward to form propeller blades. Step 5 shows the completed helicopter being held in a hand, ready to be dropped.
